## Dave's Notes

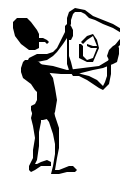

Dear Members:

As we all know this has been a crazy winter. It started out with a block buster snow storm in December, having us think, here we go with another snowy winter—only to have January be one of the coldest on record and February not far behind, leaving us with frozen water services and high heating bills. As we thaw out the last of the frozen water services and send in our annual statistical report to the State, can spring be far behind? The one thing that may have gone unnoticed, is that it wasn't a good winter for ground water recharge. The lack of snow and frozen ground may leave us with a problem this summer, with lower than normal ground water levels, leaving us no choice, but to reinstate our water restrictions earlier than normal. This could all change with a wet spring or enough rain during the summer. But it's something we should be keeping an eye on. It may seem too early to worry about this, but who knows! And as we all know mother nature always has the last word. I hope the **WORD** is **RAIN** and not more **SNOW!**

Hope to see you all at the next meeting.

With Water Works Pride  
Dave Masciarelli
